PERSONAL PROJECTS

Shop Management System (11/2022 - 06/2023)

- This project is about managing an electrical shop in a rural area, which helps to communicate between owner and user.
- In this project, we use HTML, CSS, JS for frontend development and PHP as the database language.

Educational Website (01/2023 - 06/2023)

- This is a website that is hosted on Blogger and specially made for students, where they find many types of study materials for their self-study.
- I build this website to manage my study notes as well as help others to learn more.
